MILD HYBRID

Reduce tailpipe emissions

Our mild hybrids recover energy produced when braking and store it in a 48V battery. When this energy is used, fuel consumption and tailpipe emissions are both reduced.

Mobility refined

The XC40 mild hybrid has been engineered to deliver smooth take-offs and refined acceleration, making both city and highway journeys more refined.

Fuel savings

Every drop of fuel saved helps - and in our mild hybrids, you enjoy lower fuel consumption without experiencing performance compromises.
