What is mild hybrid in a Volvo?

Mild Hybrid Cars| Volvo Cars

The mild hybrid, also known as MHEV or the integrated started generator (ISG), is a powertrain that utilizes both a combustion engine and an electric motor to minimize CO2 emissions, improve the fuel economy and provide performance benefits.

Right here. Right now.

Stylish. Spacious. Something special. Make yourself comfortable in our most luxurious SUV - now with Google built in.

Tick every box.

Inside the XC90 SUV, enabling features ensure a seamless experience awaits.

Go the extra mile.
Harness energy for a smoother drive with our mild hybrids.

Reduce tailpipe emissions

Our mild hybrids recover energy produced when braking and store it in a 48V battery. When this energy is used, fuel consumption and tailpipe emissions are both reduced.

Mobility Refined

The XC90 mild hybrid has been engineered to deliver smooth take-offs and refined acceleration making both city and highway journeyd more refined.

Fuel Savings

Every drop of fuel saved helps - and in our mild hybrids, you enjoy lower fuel consumption without experiencing performance compromises.
